Poison Information

239-2155

ANIMAL BITES

If possible to do so without endangering other people, the animal should be caught and kept until it is tested for rabies or other diseases. Call Humane Society.

1. Do not try to stop bleeding from non-major animal bites. Bleeding will clean out the wound.
2. Wash wound thoroughly with mild soapy solution.
3. Cover wound with sterile dressing.
4. Keep person calm and warm.
5. Call a doctor. Animal bites are dangerous and should be checked by a physician.

BLEEDING

In severe cases it is essential to stop the bleeding first, then get medical assistance.

The 3 First Aid methods for stopping bleeding are:

DIRECT PRESSURE PRESSURE POINTS TOURNIQUET

1. In the direct pressure method, pressure is applied directly on the wound itself; use a sterile cloth if possible. This method will usually control the flow of blood; always consider this method first. If severe bleeding continues, it will be necessary to use the pressure point or tourniquet method.
2. The pressure point method is used to stop arterial bleeding (blood bright red spurting) from arms or legs. In this method, pressure is applied to the artery supplying the blood. For bleeding from the arm the pressure point is mid-way between the armpit and elbow on the inner arm. For the leg the pressure point is just below the groin on the front inner half of the thigh.

With severe arterial bleeding, it is important that you locate the pressure point within seconds. Therefore, practice locating the pressure points so that you will find them instantly in an emergency.

If severe bleeding cannot be stopped quickly by direct pressure or the pressure point method, a tourniquet must be used.

3. The tourniquet method is used to stop the flow of blood to and from the limb by tying a band as close to the wound as possible between the wound and the heart. Improperly used, a tourniquet can cause loss of limb or aggravate shock. However, when severe bleeding from an arm or leg cannot be stopped within seconds by the preferred methods, a tourniquet must be used to save a life.

BURNS

1st Degree Burn (Skin Red and Tender)

1. Flush with cold water.
2. Cover burn with gauze or dry sterile dressing.

2nd Degree Burn (Skin Red, Tender, and Blistering)

BURNS CONT

1. Immerse in cold water (NOT ice water) for 1-2 hours.
2. Call a doctor.
3. Gently blot dry. Do not break blisters, use grease or antiseptic.
4. Cover with dry sterile dressing.

3rd Degree Burn (Skin Burned or Charred)

1. Call a doctor.
2. Do not remove adhered particle(s) of charred clothing.
3. Cover with thick sterile dressing, freshly ironed or laundered sheets or linen.
4. Elevate burned area.
5. Seek medical assistance immediately.

CHOKING

People who choke on food usually cannot speak or breathe. If person is coughing, let him cough out object.

Do not slap someone on the back at first signs of choking. Only if a person cannot clear the airway must you help.

BACK BLOWS

A rapid series of sharp blows delivered with the hand over the spine and between the shoulder blades. (Small child can be held upside down).

MANUAL THRUSTS

A series of thrusts to the upper abdomen or chest to force air from the lungs.

1. Stand behind the victim.
2. Reach around bear-hug style with your hand across the abdomen, between the navel and the rib cage.
3. Pull toward you in a quick upward thrust (repeat if necessary).

It might be necessary to remove the foreign object with your fingers. Be cautious not to push the object farther down the throat.

DROWNING

If the person is unconscious, you must administer artificial respiration and call for immediate medical assistance.

1. Administer artificial respiration by mouth to mouth or by the back pressure arm lift method.
2. Turn victim's head to one side to prevent vomit from entering lungs.
3. Keep victim warm and comfortable.
4. Seek medical assistance immediately.

FAINTING

Fainting is a partial or complete loss of consciousness due to temporary insufficiency of blood supply to the brain. Fainting might constitute a brief episode in the development of a serious medical problem; call your physician.

SYMPTOMS

Complaints of weakness, dizziness, or spots before the eyes, pale or sweaty appearance.

1. Place victim on his back with head lower than his feet.
2. Loosen clothing and cover with blanket if necessary.

FAINTING CONT

3. Use a cold compress on victim's face or ammonia inhalant to revive.
4. Have victim rest at least 15 minutes.

Do not give liquids or food.

FRACTURES & BROKEN BONES

Warning* Persons with neck and back injuries should not be moved by anyone except trained medical personnel, except in life threatening situations. Request medical assistance immediately.

In the case of an open fracture, stop the bleeding first and cover the wound with a sterile dressing.

1. Allow victim to place break in comfortable position.
2. Apply splint to immobilize the limb.
3. Place victim on his back and cover with blanket if necessary.

HEART ATTACKS

When the first signs of an attack appear, immediately call ambulance or get the victim to an emergency hospital. If this is not possible, call for medical assistance.

Warning* Call a physician even if the victim thinks he will feel better in a few minutes.

SYMPTOMS

Pain in the upper abdomen, chest, possibly extending into the arms or neck. Shortness of breath, nausea, vomiting, and sweating.

1. Place victim in comfortable reclining position.
2. Loosen clothing.
3. Keep victim calm and cover with blanket if necessary.
4. If victim stops breathing, apply artificial respiration.
5. If victim loses consciousness, his heart may have stopped... Apply CPR. To learn CPR (Cardiopulmonary resuscitation) call your local Heart Association or Red Cross.

HEAT STROKE

Heat stroke is characterized by high body temperature, hot, flushed skin, rapid but weak pulse and possible unconsciousness.

Remove the victim from the source of heat immediately, into a cool area. Seek help at the nearest emergency room. While enroute to the emergency room, victim will benefit from being sponged on side of neck, armpits, sides of chest and on inner thighs with cool water.

Heat exhaustion, characterized by pale and clammy skin, nausea, headache and weakness, may be treated with sips of water. Bring the patient to an emergency room.

Heat cramps are characterized by spasms in the legs and abdomen. Place patient in cool area and gently massage the affected areas. Take two salt tablets every

HEAT STROKE CONT

15 minutes, if available. If salt tablets are not available, mix 1/4 tsp. salt in one glass water and sip. Seek the advice of your family physician, or go directly to an emergency room.

INSECT BITES & STINGS

Most insect bites are not serious unless there is an allergic reaction. If there is doubt about what kind of insect has bitten you, call a doctor. If possible, catch the insect in a bottle for identification.

1. Remove stinger if still in skin.
2. Apply ice to area of bite.
3. Apply a thick paste of baking soda and water to area of bite.

BLACK WIDOW and BROWN RECLUSE bites are rarely fatal to adults, but the victim should receive medical attention.

SYMPTOMS

Victim may experience a swelling, redness and burning pain in the area, as well as stomach pain, severe headache, cramps, rash, or profuse sweating.

1. Treat as above.
2. Give aspirin for pain. Call a doctor.

POISON IVY & OAK

Skin may become red and swollen, small blisters may appear on the skin, which may become large after several hours. Victim may have violent itching.

If victim develops a large rash, get medical help. Do not let him scratch.

1. Wash area thoroughly with soapy solution.
2. Swab with rubbing alcohol.
3. Apply calamine lotion. For large rash, bathe in solution of one cup baking soda in a bathtub of water.

SHOCK

Shock is characterized by pale, cold skin, a rapid but weak pulse, nausea or severe thirst. In later stages, the victim become unresponsive and pupils dilated.

Give necessary first aid to eliminate the cases of shock, such as excessive bleeding or stoppage of breathing. Have victim lie flat and cover him with a light blanket. Check to ensure open airway, and if patient is vomiting, tilt head to side. For victims of head injuries, keep head higher than rest of body. Other shock victims benefit from having feet raised from 8 to 12 inches above the head.

Call for ambulance immediately.

UNCONSCIOUSNESS

1. Apply artificial respiration if breathing has stopped.
2. Turn victim's head to one side if possible.
3. Place victim on his back with his head lower than his feet.
4. Cover with blanket if necessary.
5. Call a doctor.

EMERGENCY ANTIDOTES

IN CASE OF POISONING, KEEP CALM AND CALL:

A Doctor, Poison Control Center Or Emergency Room At Once

Then using the table below, give **FIRST AID** at once.

If no antidotes are available, give large amounts of water (Unless victim is unconscious). Keep patient warm and induce vomiting by tickling the back of the tongue with the finger. Do not cause vomiting in cases of Acid or Alkali poisoning. A sample of the substance

ingested should be brought to the hospital, in the container in which it was packaged. If possible, try to record the time of ingestion and the amount ingested. If the patient has vomited, save a sample of the vomited material.

Act fast in a poison emergency!

POISON: Medicines, Headache tablets, Polishes, Paints, Cleaners, Thinners, Insecticides, Weed killers

1

**CALL NEAREST
POISON CONTROL
CENTER**
No. _____

2

If you can not get instructions quickly:
**CALL LOCAL AMBULANCE SERVICE or
TAKE PATIENT TO NEAREST EMERGENCY ROOM**
Hospital phone _____

3

DON'T CAUSE VOMITING IF PATIENT:

- A. Is unconscious or in coma.
- B. Is having convulsions.
- C. Has swallowed a corrosive substance that burns the mouth or throat (Toilet Bowl Cleaners, Lye, Ammonia, Bleach).
- D. Has swallowed a petroleum product (Kerosene, Lighter Fluid, Paint Thinner, Furniture Polish.)

4

OTHERWISE MAKE PATIENT VOMIT BY:

- A. Keep mouth open with spoon handle.
- B. Place patient face down with head lower than hips (spanking position).
- C. Tickle back of throat with your finger.
- D. If he doesn't vomit. Have him drink two glasses of water and try B and C again (water helps dilute the poison).

REMEMBER

PREVENTION IS THE BEST TREATMENT, HERE'S HOW:

Keep all poisons in their own identifiable container.

Store all poisons and medicines high up and locked up.

Never give or take medicine in the dark.

Check all medicines periodically and throw leftovers down the toilet.

KEEP ALL MEDICATION AWAY FROM CHILDREN

BE PREPARED TO SAVE A LIFE

Place nonbreathing victim on back, face up.

Clean out any foreign matter by turning victim's head to side, force mouth open and wipe out throat and mouth with finger or cloth.

MOUTH TO MOUTH METHOD IN ADULTS:

Insert thumb of your left hand between victim's teeth. Hold the jaw upward so that the head is tilted backward. Close victim's nostrils with your right hand. Take a deep breath and place your mouth tightly over victim's mouth and your own thumb. Blow forcefully enough to make victim's chest rise. Repeat inflations every five seconds.

MOUTH TO MOUTH METHOD IN CHILDREN (Or in adults with tight jaw.)

Grasp the angles of the child's jaw at the earlobes with both hands, and lift up forcibly so that the head is tilted backward. Push child's lower lip toward the chin with your thumbs. **NEVER LET THE CHIN SAG.** Take a breath and place your mouth tightly over child's mouth (For small child cover both mouth and nose). Blow in gently until his chest moves, then take your mouth off and let him exhale passively. Repeat inflations about one very three seconds. **FOR INFANTS USE PUFFS.**

1414 S STORY • BOONE

RESIDENTIAL

COMMERCIAL

Boone, a midwestern Iowa city with a substantial population of 12,602, has an impressive history. Tracing Boone's heritage back to chapter one, history points to her namesake, Captain Nathan Boone, son of Daniel Boone. In the summer of 1835 Captain Boone and Company H of the U.S. Dragoon's marched through this territory on their way to Wabasha's Village in Minnesota. The expedition camped about three miles east of the timber along the Des Moines River in Boone County.

The rich, forested land promised a bright future for the pioneers who worked their way across Iowa's rugged prairies to settle the land. Here, a town was platted and named in honor of Captain Boone. By 1865 the town boasted 300 buildings in the locality.

With the arrival of the railroad and all the innovations of such 19th century technology Boone became a reality in Iowa's fast-growing map. In 1866 the name of Boone was changed to Montana. In 1871 a petition was signed and filed in the circuit court asking that the name be changed from Montana to Boone. Boone became the county seat in 1887 when the former incorporated town of Boonesboro, then county seat, was annexed and became a part of Boone. This part of Boone was later called West Boone, and the Court House is still located in that part of town.

The town grew and expanded to include the industrial as well as the farming community. Coal mining in Boone County brought the world of industrial development to the growing community. Remains of that prosperous venture can still be seen in the slag piles surrounding Boone.

Today, Boone's hearty population of over 12,000 is employed in both industry and farming. Boone's wholesale and manufacturing industries include the Merit Baking Company, bakers of Archway Cookies; the Private Stock Winery,

BOONE, THE BIRTHPLACE OF MAMIE DOUD EISENHOWER...AND A WHOLE LOT MORE!

Iowa's largest winery; a tanning company, ironworks, concrete products, refrigeration, envelopes, industrial soaps, aluminum doors and windows, electronic aeration equipment, frozen meat products, dairy products, ice cream, floral products, paper tubes and cores, steel beams, farm implements, blank books, and ceramic supplies. Boone is the Iowa Division Headquarters for the Chicago and North Western Transportation Company.

The farming community in Boone is richly diversified with dairy products, hogs, corn, cattle, sheep, oats, soybeans and hay. Livestock markets and grain storage facilities are centered in Boone and the surrounding area.

Boone has six elementary schools and a Junior-Senior High School. Construction started in 1984 for a new addition and remodeling of the Jr.-Sr. High School building. College level education opportunities are available in the Boone Campus of the Des Moines Area Community College.

Also located in Boone is a National Guard unit, the state office of the Iowa High School Athletic Association, and the Iowa High School Music Association.

Boone's city boundaries enclose six beautifully kept parks, including 275 acres in the city. In addition, Boone is not far from the Ledges State Park, one of Iowa's oldest state parks, with 900 acres of lovely wooded park, and ample space for picnickers, campers, and nature lovers.

Recreational activities also abound in the nearby Don Williams Lake and Golf Course and the Boone Golf and Country Club. Several recreational, youth, and church camps are located in the Boone area along the Des Moines River Valley, making Boone County the camping center of central Iowa.

Just outside the city limits, high above the Des Moines River is the legendary highest double track railroad bridge in the world. The High Bridge is now called the Kate Skelley High Bridge, named for a young heroine, who, in 1881 crossed the Des Moines River in the midst of a ferocious storm to warn an oncoming train that the bridge was out. The Kate Skelley Memorial Park and Railroad

Museum in Moingona, was established in her honor, and is located south of Boone.

Boone is the only city that can boast of being the birthplace of Mamie Doud Eisenhower, the wife of the 34th President of the United States. Mamie's Birthplace has been restored to its original 1869 era. The home has been toured by thousands of visitors from all fifty states and over thirty foreign countries since dedication in June of 1980. Located at 8709 Carroll Street, this historic home is open from 1 to 5 p.m., Tuesday through Sunday, April through December, and by special arrangement. It is closed Mondays and during the months of January, February, and March, except by appointment, telephone (515) 432-1896.

Iowa's largest library of living plans can be visited at the Iowa Arboretum, located south of Boone.

The nation's newest shortline tourist railroad is the Boone and Scenic Valley Railroad, operated over eleven miles of scenic track, formerly part of the Fort Dodge Des Moines and Southern, once Iowa's largest interurban. Trains depart

from 11th and Harrison Streets for a breathtaking ride through the Des Moines River Valley, across the highest single track interurban bridge in the United States, telephone (515) 432-4249.

Tours are also available through several Boone industries, including Merit Baking Company, Private Stock Winery, and the Boone Blank Book Company. Boone has many fine retail stores, three motels, and many restaurants. Visitors can also shop in The Livery, a former livery building at 806 - 7th Street, now housing unique shops and a restaurant. The 11th Street Station, located at 11th and Marshall Streets, is the former Fort Dodge, Des Moines, and Southern freight station, which offers a museum, shops, and tours of the Kate Shelley Parlour Car.

The Boone Area Chamber of Commerce, Convention and Visitors Bureau, located at 806 - 7th Street in The Livery, will assist interested groups and organizations in arranging tours of historic and scenic Boone and Boone Counties. For brochures and information, write Box 306, Boone, IA 50036 or call (515) 432-3342.

PUFFERBILLY DAYS

Written by Mary Maybee

Two years ago a popular newspaper columnist (an Iowa Boy) chose Boone Pufferbilly Days as one of the ten worst-named festivals in Iowa. The people of Boone were undaunted by this slur against them. Being very proud of their railroad origin and enthusiastic about their festival, they worked hard and in 1982 Boone Pufferbilly Days was selected as one of the ten top festivals in Iowa.

An estimated crowd of 30,000 attended last year's celebration and over that number is expected to join Boone's 13,000 residents this year.

Many months of planning by a nucleus of approximately 25 committee chairmen and the efforts of several hundred eager volunteers during the three day celebration make Pufferbilly Days a weekend to be remembered. The event is coordinated by A.J. "Toche" Terrones, Executive Vice President of the Boone Area Chamber of Commerce, the sponsoring organization.

In 1977, the Boone Chamber of Commerce Retail Committee decided to promote retail sales with a weekend sidewalk sale and street dance in the downtown area. The name Pufferbilly Days was chosen to give a theme to the event and to recognize the town's founding by the railroad. The first event was chaired by Dale Points. The idea for the event was originated by June Berg and Holly Larson, then president of the Boone Chamber.

In 1978, under the direction of Charles Klinckefus, the parade was expanded in an effort to get more people involved. At this time, Pufferbilly Days was held in late September.

In 1979 George Maybee, Assistant Vice-President and Division Manager-Iowa Division of the Chicago & North Western Railroad, arranged for excursion rides over the High Bridge with diesel engines and coaches from the Union Pacific Railroad. A new tradition was established with the Pufferbilly Days Committee honoring the retired C & NW employees. Mr. James Wolfe, president of the C & NW, came to Boone to be grand marshal of the ever growing Pufferbilly Days. Many railroad employees volunteered their time to run the train rides, which were filled to capacity each trip. Pufferbilly Days had another successful year with the flea market expanding to the park on Sunday.

The 1979 celebration was held in early October with the sale of golden spikes to fund the celebration on an ongoing basis originated by the year's co-chairmen. Chairmen Rick LePera and Dennis McFarland extended themselves and their committees and had a successful event, far greater than anyone had expected.

By 1980 the flea market under the expertise of Leonard O'Neil became a major attraction, luring non-Boone residents to Pufferbilly Days. This year the railroad brought in from the National Railroad Museum in Green Bay, Wisconsin the Command Cars used by General Eisenhower in Europe during World War II. The special interest of these cars is the fact that Mamie Eisenhower was born in Boone and visited an uncle, Joel Carlson, here frequently. Her birthplace had been renovated and was entered in the national historical registry by the Boone Historical Society. The birthplace had been dedicated earlier in the year.

Under the guidance of co-chairmen Mel Holthus and George Silberhorn, the parade grew longer, continuous entertainment on the stage, set up on mainstreet, followed through on into street dancing at night. The Sunday program, with "Art in the Park" as its impetus, expanded to be an important segment of Pufferbilly Days attracting many families.

In 1983 the C & NW Railroad raffled off six-course dinners for six winners on their newly acquired "business car." The six lucky winners were chosen by a drawing and the dinners for them and a guest were held the weekend after Pufferbilly Days. Money from the raffle was used by the Chamber of Commerce for the next year's Pufferbilly Days. We now had a real town celebration on our hands, with many eager volunteers anxious to get involved.

Just six years old now the festival developed with surprising speed. All committees set their goals higher than ever. George Maybee announced he had made arrangements for a steam engine, from the Mid-Continent Railway Historical Society in North Freedom, Wisconsin, and rail coaches from the C & NW commuter service in Chicago, to come to Boone and once again provide rides over the newly dedicated Kate Shelley High Bridge and back - about an eight mile trip.

The parade chairman George Eckstein made a coup d'etat this year by obtaining the Iowa State Marching Band to lead off the parade. The 1982 parade was two hours long and the float awards competition was very stiff with many more organizations wishing to get recognition in the now spectacular Pufferbilly Parade. The Beer and Brat Garden was housed for the first time under a gigantic canvas canopy. With so many skilled volunteers running all aspects of Pufferbilly Days, enough profits were generated to give a scholarship to two young people for the Des Moines Area Community College, Boone

Campus, as well as provide funds for this year's celebration.

In 1983 the chairmen Don Reimenschneider and Lennie Bloomquist were happy to announce the Mid-Continent Railway Historical Society and the C & NW Railroad had agreed to bring back the steam engine, "Old 1385," and coaches for the Kate Shelley Express across the High Bridge. George Maybee, who was instrumental in getting the railroad's cooperation and participation in Boone's celebration of its rail heritage, was named grand marshal of the parade. With him a representative of each of the nine local railroad unions (including one national union president) were honored as parade marshalls as a tribute to the many hours of service by railroad employees to Pufferbilly Days.

Wine was added to the "Brat and Beer Garden." Pop and hot dogs will also be sold. An early morning breakfast will be available for early risers and parade participants Saturday.

The Buckskin Rendezvous is expecting its largest turnout this year. The annual 5k and 10k Pufferbilly Run is now in its fourth year and growing. The canoe races will be held on Saturday again - a repeat of a popular event.

Again this year are bus tours of Boone County historical sites, including Mamie Eisenhower's Birthplace. Other new entries are the Pufferbilly Open, an 18 Hole Golf Tournament, and a horseshoe pitching contest.

New also this year is the 11th Street Station, located at 11th and Marshall streets. The station,

a unique railroad museum and shopping mini-mall, is a very historical landmark. Built in 1908, it lives again with lots of nostalgia, and it's many shops are decorated with memorabilia from all eras of railroading. Also on the grounds are several vintage railroad passenger cars including the famous "Kate Shelley" Pullman Parlor Car.

Puppet shows, a magic show, baseball and softball games, the ever popular spelling bee, a pet show, and tennis tournaments are just some of the events scheduled. Pufferbilly Days has something for everyone.

Some may say we have a funny name for our town's celebration, but we think it is the best name we could find for a town that owes its very beginning to the old Pufferbilly engines and the men that ran them. The name may be strange to non-railroad people, but in Boone we are very proud to say it is all ours. Come on home to Pufferbilly Days - you'll love it!

The established dates for Pufferbilly Days have been established as the weekend after Labor Day

Energy Saving Tips For The Home

Whether you heat or cool your home, apartment or business with gas, oil, electric or other, you could save yourself 20% - 50% with a moderate investment in insulation or additional insulation. Many older homes do not have ceiling insulation and the addition of 6-inch batts or 8 inches of blown insulation could save 40% on heating costs. Your insulation needs will vary according to the climate of your area and the amount and kind of insulation you currently have. Consult a reputable insulation contractor or dealer for guidance. An investment in insulation today will pay for itself again and again in years to come.

WEATHERSTRIP

Test your windows and doors for drafts by moving a lighted candle around the frames. Any draft will cause the flame to dance. A minimal investment in caulking, weatherstripping materials and time could save up to 10% in energy usage.

In a colder area storm windows can be a good investment and should pay off their investment in five years or less. A less expensive solution would be to cover your windows in the winter with clear plastic. (Apartment renters can do this)

THERMOSTATS

Proper adjustment of the thermostat during both the heating and cooling seasons can account for large savings in energy costs.

In the winter a thermostat setting of 65° during the day with a night setting of 55° is recommended. If everyone in the family is going to be away for the day, remember to dial down for additional savings. For every one degree reduction of the average temperature of your home you can expect about a 3% savings of your energy costs. In winter the least expensive way to warm up is the use of warmer clothing.

A summer air conditioning thermostat setting of 78° is recommended.

You might want to consider an automatic setback thermostat to adjust your heating and cooling needs to your particular schedule. It can automatically turn the heat down when you are at work or asleep and automatically turn up the heat just before you get home or wake up. The automatic setback thermostat also can be adjusted to your summer cooling needs.

HEATING SAVINGS

In the early Fall don't turn the heat on until absolutely necessary; add an extra blanket to the bed instead.

In the day open drapery on the sunny side of the house and collect the free energy of the sun. Remember to close all drapery at night; heat escapes through glass 14 times faster than through walls.

Close off any unused rooms or close the registers in areas not used. Children should be instructed to avoid unnecessary opening of doors and to go in and out quickly to reduce heat loss. Garage doors left open also drain a house of valuable heat.

Keep the air flow to all registers, grills, outlets and baseboard heaters unimpeded. Clean or replace air filters regularly as it takes more electricity to pull air through a dirty filter.

COOLING SAVINGS

Overcooling and unnecessary cooling is expensive and wastes energy. Window fans, room fans or whole-house ventilating fans use about 1/10 as much wattage as a typical air conditioner. Use of these fans instead of the air conditioner except on all but the hottest days can save energy.

Drapery pulled on the sunny side of the house, awnings, overhangs, and trees can help reduce the heat build up in your house. On hot days try not to use your oven, the stove top, unnecessary lighting or the clothes dryer. If necessary to use these appliances, schedule their use at night when it is cooler.

Again, clean filters and unobstructed vents will help reduce air conditioning energy costs.

WATER HEATING

Many water heater thermostats are turned up too high. Turning the water heater down from 150° to 140° can save 6%. Also insulate your water tank to keep the heat in.

Repair leaky faucets (especially hot water) and use low-flow shower heads to cut hot water use and save energy.

Take showers whenever possible instead of baths since the average shower uses about half the amount of water as a bath.

Lastly, consider a solar water heater if the need arises to replace your unit. Depending on your climate, and unit purchased, a solar water heater can return its investment in only a few years.

KITCHEN ENERGY SAVINGS

Don't cook food or boil water in an open pan if you can avoid it. Match the pan size to the burner so less heat will be lost to the air.

When using your oven, try to cook several dishes at once. Don't peek unnecessarily in the oven and release valuable heat.

A microwave oven is an energy saver because it cooks food in a much shorter time. It also does not release as much heat to the kitchen as a standard oven. (Important in the air conditioning season)

The average dishwasher uses 14 gallons of hot water per load and a lot of electricity to dry the dishes. Make sure that every load is a full load and consider letting your dishes air dry after a load by opening the door a little.

Obviously, holding your refrigerator or freezer door open can waste a lot of energy. Decide what you want from the refrigerator or freezer first and then open the door to look for the item. Before buying a new refrigerator or freezer, check the comparative energy usage figures with the dealer and select the most energy efficient unit.

LAUNDRY SAVINGS

Inefficient laundry habits can waste a lot of energy. Make sure your washer and dryer always have full loads before running. Use the cold cycle of your washer as often as possible. Vent your dryer to the outside in the summer to get the warm moist air out of the house; but in the winter you can vent this air to the inside for added heat and humidity for your home.

Auto Trouble Shooting Guide

ENGINE WILL NOT START

STARTER WILL NOT OPERATE

Battery weak or defective - Check headlights; if dim, charge battery or jump start. If battery won't hold charge or tests bad, replace.

Poor cable connections - Check connections at battery, starter solenoid, ignition switch and ground. Clean and tighten battery terminal connections and apply coat of petroleum jelly to protect against future corrosion.

STARTER SPINS BUT WILL NOT TURN OVER ENGINE

Armature shaft dirty or corroded - Clean shaft and lubricate with lithium grease.

Starter drive clutch defective - Check drive clutch, replace if necessary. Possibly replacing starter with new or rebuilt unit would be easier than the above.

ENGINE TURNS OVER BUT WILL NOT START

Engine not getting gas - Out of gas? Check for fuel in tank. Check for broken or leaking fuel line. Possibly frozen fuel line, if winter.

Broken fuel pump - Replace

Choke stuck open - If automatic choke; adjust thermostatic coil. If manual; check for broken cable.

No spark - Check to make sure all spark plug wires are connected. Check inside of distributor for broken wires on points or points which do not open when engine turns over.

ENGINE STARTS BUT STALLS

Choke adjustment incorrect - Adjust. Check for broken vacuum lines. Check for sticking or broken linkage. Realign or replace.

Idle speed too fast or slow - Adjust carburetor to specs.

Fuel filter plugged - Replace.

ELECTRICAL SYSTEM

ALTERNATOR LIGHT STAYS ON WITH ENGINE RUNNING

Loose or broken belt - Tighten belt or replace.

Alternator or generator not charging - Have voltage regulator checked. If voltage regulator is okay, have alternator or generator checked; repair or replace.

CERTAIN ELECTRICAL SYSTEMS DO NOT WORK

Blown fuse - Replace blown fuse for system not working. Exam: Headlights out; replace headlight fuse. If fuses continue to blow, check for shorts in system; wires broken, cracked, insulation off, etc.

Turn signals do not flash - First check for burned out bulb or fuse. If okay, replace signal flasher.

COOLING SYSTEM

ENGINE OVERHEATING

Not enough coolant - Add water and antifreeze mixture. Check for leaks.

Fan belt too loose - Tighten.

Broken water pump - Usually leaks & squeals when bad; replace.

Loss of system pressure - Check radiator cap spring tension; replace if bad. Check for leaks.

Thermostat stuck closed - Replace.

Timing off - Reset to specs.

COOLANT LOSS

Radiator leaking - Take to radiator shop or solder leaking spot.

Hoses leaking - Check connections; tighten if necessary. Replace leaking hoses.

Water pump leaking - Replace.

Check your automobile's manual for location of part(s) or system(s) which are giving trouble and for specifications.

BRAKE SYSTEM

SCRATCHING NOISE

Worn out brake pads or pucks - Replace brake pads and/or pucks and have brake drum or rotor machined if necessary to remove scratches.

SQUEALING NOISE

Brake drums or rotors glazed - Have machined.

CAR PULLS TO ONE SIDE

One wheel with bad brakes - Check for leaking brake line, plugged line, leaking wheel cylinder or stuck wheel cylinder. Replace.

REAR WHEELS LOCKED

Emergency brake stuck on - Release. Possibly frozen, if winter.

BRAKE PEDAL HOPS UP & DOWN

Brake drum out of round or rotor warped - Have machined.

LOW BRAKE PEDAL

Low & hard - Low brake fluid; top up. Brake linings worn out; replace.

Low & soft - Air in brake lines; bleed.

TIRES

UNEVEN TIRE WEAR

Worn outer edges - Air pressure is too low; add air.

Worn middle - Air pressure is too high; take air out.

Uneven wear across tread - Out of alignment, worn out shock absorbers or worn suspension parts; align and/or replace worn shocks or suspension parts.

TIRE VIBRATION

Out of balance - Rebalance tires.

Suspension problem - Check alignment; check front wheel bearings for enough grease; proper tightness or wear; or check for worn or broken suspension parts.

SHOCK ABSORBERS

RIDE BOUNCY & UNCONTROLLABLE

Shocks are worn out - Replace.

TIRE WEAR UNEVEN

Shocks are worn out - Replace.

Energy Saving Tips For The Driver

There are 3 major ways to lower your gasoline usage and thus the amount of money you spend for gasoline: 1) **DRIVE LESS** 2) **IMPROVE DRIVING TECHNIQUES** 3) **BETTER MAINTENANCE OF YOUR CAR**

DRIVE LESS

Think twice every time you take the car out of the driveway. Ask yourself these questions: Is this a necessary trip? Could this trip be combined with another? Could this trip be shared with someone else?

Short trips are costly because your auto does not get good gas mileage until it is fully warmed up which takes about 15 minutes. A car that gets 20 MPG will be lucky to get 10 MPG in a trip of 5 miles or less. Instead of five, 5-mile trips; combine the five trips into one 25-mile trip. A typical family car can take the following trips on 25 gallons of gas:

Ten 40-mile trips, or
Sixty 4-mile trips, or
Ninety 2-mile trips, or
one hundred 1-mile trips.

At \$1.00 per gallon, the fuel costs would be:

6.4¢ per mile on 40-mile trips, or
10.4¢ per mile on 4-mile trips, or
13.9¢ per mile on 2-mile trips, or
25.2¢ per mile on 1-mile trips.

Preplanning of each trip for the shortest route with the least traffic and with the fewest stop lights and stop signs can save valuable gas and time.

Eliminate extra trips by use of public transportation, use of the mail, and use of your yellow pages. Telephoning around to find what store has the item you are looking for or the store with the best price can save many needless, extra, expensive short trips.

Car pooling to work or car pooling with a friend to the grocery store are proven ways to cut the amount of gasoline you use.

IMPROVE DRIVING TECHNIQUES

Experts say the single most important element in conserving gasoline is the driving skills of the driver. A careful driver should be able to get 30% better mileage than an average driver and 50% better mileage than a poor driver.

It is a fact that a car gets better mileage with a warm engine, but it makes no sense to warm up a car longer than 30 seconds. Wait for the oil warning light to go out or the oil pressure gauge to start to climb and drive off. Take it easy the first couple of miles until the engine and rest of the drive train warms up, especially in cold weather.

Experts now recommend getting up to cruising speed as quickly as possible by accelerating quickly and smoothly without making a jackrabbit start. Then maintain an even speed trying to anticipate the traffic ahead. Repeatedly varying speed by 5 miles per hour can reduce gas mileage by as much as 1.3 miles per gallon.

On the highway drive at moderate speeds. Most cars can get 20% better mileage at 55 MPH than at 70. When on the highway in the summer drive with the windows closed and the vents open. If you are still uncomfortable, turn the air conditioner on low rather than opening the windows. The aerodynamic drag created by open windows eats up more power than does the air conditioner.

Avoid excessive idling by turning off the engine anytime you anticipate being stopped for more than a minute. It takes less gasoline to restart the warm engine than it does to idle.

BETTER MAINTENANCE OF YOUR CAR

There are several free maintenance practices which will get you better gas mileage quickly and easily. The first is to check tire air pressure (when the tires are cool) at least once a month and inflate your tires to the maximum recommended pressure printed on the tire sidewall. The second is to remove all excess weight (bags of sand left from winter, golf clubs, heavy box of tools, etc) from your trunk.

Follow your owners manual maintenance schedules. Replace spark plugs, check the timing, and replace dirty, clogged air and gas filters at recommended intervals.

Brakes or an emergency brake that grab or drag, waste gas and also will need to be replaced in a shorter period of time.

Improper front wheel alignment can increase gas usage as well as shorten tire life. Radial tires have also proven that they get better MPG and last longer than conventional tires.

Change your oil at recommended intervals with a good multi-grade oil. Do not use a higher viscosity oil than recommended by your manual since heavier oils increase the internal friction of your engine. In cold climates in the winter, a lower viscosity oil is recommended to decrease internal engine friction and increase MPG.

Regular maintenance can not only increase your car's MPG, but it can also give your car a longer, more trouble-free life.

REMEMBER GAS SAVED = \$\$\$ SAVED

MILES PER GALLON (MPG) CHART

To use this fuel mileage chart:

- 1) Fill your tank completely and record the mileage.
- 2) The next time you need gas, fill the tank completely again. Record the mileage since the previous fill up and subtract to find the difference. This figure is the number of miles you have driven with the tank of gas. The number of gallons it took to fill the tank is the amount of gas used.
- 3) Use the miles between the 2 fillups and the number of gallons used to find your miles per gallon (MPG) for that tank of gas using this chart.

	GALLONS																					
	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25

100% ACCURACY

It takes time and effort to compile white and yellow page listing information, print and distribute this directory. Within that time some phone numbers in this directory have changed due to people and businesses moving in or out of the area and within the area. This is why it is impossible for any telephone directory to be 100% accurate at the time of distribution.

However, the best way for us to find these changes is for you to report them. If you live in the directory coverage area and have moved or changed phone numbers, Old Heritage would like to know.

Please fill out the form on back and mail in

Thank You

FREQUENTLY CALLED NUMBERS

This space is provided for your convenience in listing frequently called numbers which are not shown in this directory.

WHY ANOTHER DIRECTORY?

Old Heritage, a Market Area Publisher, produces area wide telephone directories as a convenience for the community. Included in our phone books are complete white and yellow page listings of the home and office numbers you need from your area, not just those numbers serviced by a phone utility company.

If You Have Questions
Call:
314-394-0811

The area wide book also offers community interest pages, zip code, first aid and energy saving information, certain sports schedules, money saving coupons & a free sweepstakes drawing. Next time you need a telephone directory, pick up your area wide book. We offer you more.

WHY ANOTHER DIRECTORY?

Old Heritage, a Market Area Publisher, produces area wide telephone directories as a convenience for the community. Included in our phone books are complete white and yellow page listings of the home and office numbers you need from your area, not just those numbers serviced by a phone utility company.

If You Have Questions

Call:

314-394-0811

The area wide book also offers community interest pages, zip code, first aid and energy saving information, certain sports schedules, money saving coupons & a free sweepstakes drawing. Next time you need a telephone directory, pick up your area wide book. We offer you more.

OLD HERITAGE ADVERTISING & PUBLISHERS, INC.
P.O. Box 60
Ballwin, Missouri 63022

►Advertising-Directory & Guide (Cont'd)

YELLOW PAGES

Action People use this
buyer's guide 3.6
billion times every year.
That's why Yellow Page
Advertising pays off on
a local or national basis.

This is for all those who ever wonder where the money goes.

Her name is Rosa.

And she has been mentally handicapped since birth. But, this year, the training she receives from a local sheltered workshop will allow her to live and work independently in the real world. For the first time.

In Rosa's hometown and in yours, United Way gifts make important services like this possible.

That's the way the United Way works. One gift, one time each year, helps people all year long. Your neighbors. Your friends. People just like you.

United Way

Thanks to you, it works, for ALL OF US.

Take Advantage of CO-OP Advertising

More than 850 manufacturers have CO-OP funds available
to help local dealers pay for Yellow Pages ads promoting their
national products and services.

**Manufacturer/Distributors—
CO-OP Service:**

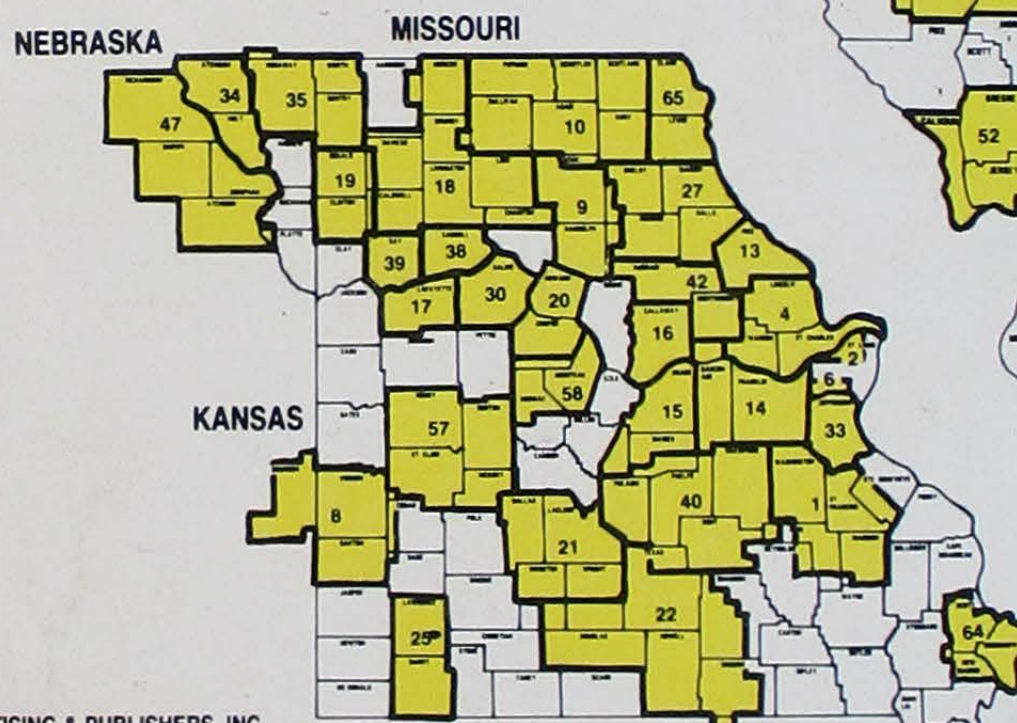

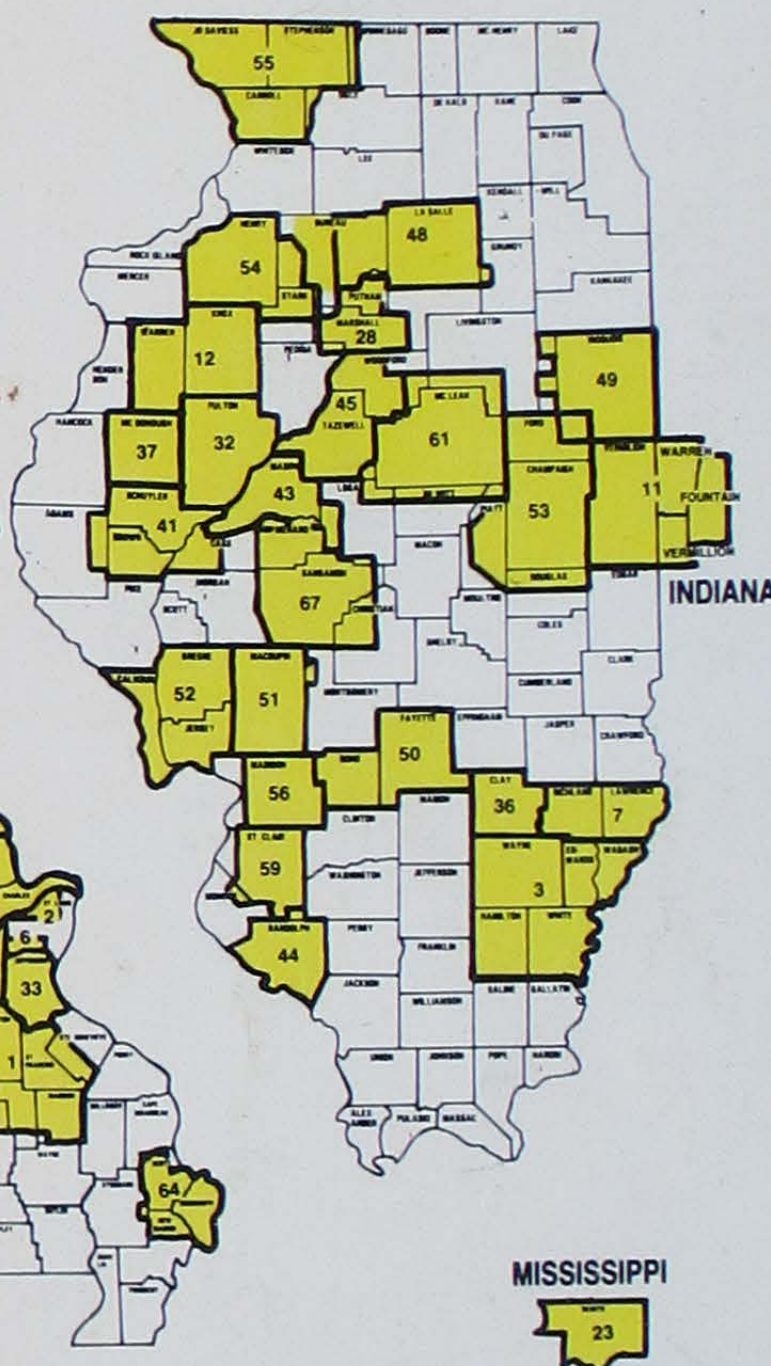

- means consistent recognition of your product and services
- assures quality control of ads
- creates a strong national image for your products or services
- competes your national advertising program
- helps local dealers promote your brands
- provides local dealer contacts for CO-OP.

**Dealers/Retailers—
CO-OP Service:**

- provides art, layout and copy for your ad
- prior approval can be obtained if necessary
- provides tear sheets and billing memos
- lets you share cost of ads with manufacturer
- maintains records of available CO-OP programs
- provides a CO-OP specialist to answer questions, handle details, and solve problems.
